

QUATERMAIN'S MINE

**Takes approximately
2 hours to play and
review**

Quatermain's Mine is an enjoyable team building simulation that focuses on themes of leadership, planning and communications.

The situation is that teams have sufficient but not excessive resources for a 20-day journey to and from the lost Quatermain's Mine.

The challenge?

*To work together and to spend as many days as possible at the mine, to
“Mine as much Gold and as many Diamonds as we can!”*

The design of the exercise is to generate opportunities for learning. There are many metaphors in the game that link elegantly to individual and organizational improvement initiatives.
